EVENT PROFILE

After the enormous success of the “Con Expo” in previous editions, this year, CEMS Bangladesh was greatly successful in the re-brand edition and thus CEMS-Bangladesh is launching its 27th edition under the re-branded name “Build Bangladesh International Expo 2022”, which is scheduled to be held from 13~15 OCTOBER 2022. “27th Build Bangladesh International Expo 2022” will be a premium exhibition showcasing of the Construction Materials, Method, Equipment, and Real Estate industry. It will reveal to the country, the rapid developments in the industry as well as new technology components. The neat layouts of the show provide many opportunities to the

consumers of the housing to see the latest offerings in the market as well as to the business visitor to carry out networking in a highly enabled environment. The exhibition is therefore not only a networking ground but also a place to find business partners and strategic alliances for manufacturing, outsourcing, sub-contracting, design, and development as well as direct marketing. The name “Con Expo” stands for Construction Materials, Method, Equipment, and Real Estate Exposition. For 24 years, this exposition has been providing a marketing platform with buyers and sellers, and also the Exposition will launch the public relation campaign as a part of our program which will give your company an added exposure, which by itself would have. The value of the economic activities of the sector in Bangladesh is estimated at BDT 737.17 billion for FY18. Meanwhile, the latest labor force survey showed that some 3.43 million workers are now employed in this sector. The construction sector is one of the 15 major sectors that contribute to the GDP in Bangladesh. Due to the rapid population growth, an influx of people from rural areas, and a growing middle class, new buildings are continuously erected and the construction sector has consequently been booming. GDP From Construction in Bangladesh increased to 7359.50 BDT Million in 2018 from 6695.10 BDT Million in 2017. GDP From Construction

in Bangladesh averaged 4732.10 BDT Million from 2006 until 2018, reaching an all-time high of 7359.50 BDT Million in 2018 and a record low of 2982.50 BDT Million in 2006.

WHY BANGLADESH? WHY NOW?

Infrastructure bottlenecks are among the largest inhibitors of economic growth in Bangladesh. The World Bank estimates that Bangladesh must spend \$7.4 billion to \$10 billion a year until 2021 to bring its power grids, roads and water supplies up to the standard needed to serve its growing population. The transportation sector alone will require between \$36 and \$45 billion of investments. Cement sales rose to about 33 million tons in the year, the highest on record, from about 30 million tons posted annually in recent years. Cement consumption grew 12 percent in 2018, way ahead of 8 percent to 10 percent average annual growth recorded in the last decade. The construction sector is playing an increasingly strong role in the economy amid continued urbanization and an array of large infrastructure projects undertaken by the government. It is one of the 15 major sectors that contribute to the gross domestic product (GDP). The sector posted 9.92 percent growth in 2017-18, up from 8.77 percent in the previous fiscal year, according to the state-run Bangladesh Bureau of Statistics (BBS). The sector's share to the GDP increased to 7.50 percent in the last fiscal year, which was 7.36 percent in 2016-17. The value of the economic activities in the sector was Tk. 73,595 crore in the last fiscal year. Some 3.43 million workers are now employed in the sector.

PROFILE OF EXHIBITS

CONSTRUCTION MACHINERY AND EQUIPMENT : Equipment for the production of building materials, Construction equipment, Municipal vehicles, Crane and trailers, Rental and leasing of construction machinery, Construction machinery, Handling Equipment, Elevators, Loaders, Trucks, System Formwork, Building tools, Welding equipment, power tools, petrol tools, Pneumatic and hydraulic tools, hand tools, Sanitary, Construction and finishing tools, cutting, measuring, drilling, metalworking tools, Scaffolding, nets, Towers, platforms, stairs, ladders, Equipment for building sites, Earth-moving, drilling, piling equipment, Materials and technologies for construction and reconstruction of roads, bridges, tunnels, trestles, etc.

CONSTRUCTION MATERIALS : Pre-fabricated structures, hangars, pavilions, Facade materials, Translucent constructions, Building structures, building envelope, Roofing materials, Attic , Drainage System, Thermal insulation, insulation, Mastics, sealants, gaskets, Waterproofing, Bases and foundations, Wall Materials, Fire-resistant materials, finishing materials, facing materials, Finishing work, Wallpaper, tiles, paints and varnishes, Ceramic, stone, brick, concrete, cement, mortar, concrete products, Construction Chemicals, building chemistry, Fireplaces, Shower rooms, spa, solarium, glass, mirrors, bronze, art forging, Floors, floor coverings, parquet, Grills, etc.

CONSTRUCTION: Urban Development, Architecture and Design, Modern technologies of construction, reconstruction and restoration, Modern design of buildings, structures and roads; Automation in construction, Modern resource-saving technologies and materials in construction, Energy and Energy Efficiency, "Intelligent" building, Engineering services, Branch Periodicals, etc.
